Introduction

One of the most important tasks in any accounting department is monitoring the flow of cash into payable accounts. Some invoices should be paid immediately to take advantage of discounts. Other invoices may be held for longer periods of time. The Radio Shack Accounts Payable System (APS) will help you watch all vendor accounts and invoices, so that you may keep as much cash on hand as possible, while retaining good credit.

The APS will print checks, cash requirements, aging reports, and totals for posting to your company's General Ledger. The APS will help you decide when to write your checks for maximum discount, and how those checks will affect your cash position.

An Overview of APS

After you "Set Up" the Accounts Payable System, daily operations will consist of: entering, selecting, and posting invoices, printing checks, and adding new vendor accounts.

Once a month, you will do "End of Period Processing". This function prints a report for posting to your General Ledger. At the end of each year, the system will update each vendor's status automatically. (Reports and summaries can be printed at any time.)

Required Equipment

It is assumed you have reviewed the general operational procedures for your equipment as explained in the Disk Owner's Manual and are now aware of how to power on your computer, load the Disk Operating System, etc.

Model I:

- TRS-80 16K Level II Keyboard
- TRS-80 16K Expansion Interface

Model III:

*Three Disk Systems will raise the capacity to 500 Vendor Accounts and 2000 Invoices (48K required).

Storage Capacity

Before you can enter data, you will be asked to choose which of three Storage Capacity Options is best suited to your needs. Once you choose the storage capacity option, you cannot decrease the capacity. If you wish to increase the storage capacity later, follow the instructions in Appendix E.

Two Disk System Options:

1. 75 Vendor Accounts and a total of 1500 Invoices.
2. 200 Vendor Accounts and a total of 1000 Invoices.

Three Disk System Option:

3. 500 Vendor Accounts and a total of 2000 Invoices. (48K required)

General Ledger Code Numbers

The Radio Shack Accounts Payable System uses General Ledger "Code Numbers" to keep track of your accounts. You will assign each of your accounts to one of these Code Numbers (GLC's) by entering your firm's General Ledger account numbers (up to four digits). You can also enter a five letter abbreviation for the account description. For example: "MERCH" could be your abbreviation for "MERCHANDISE".

If your company has General Ledger account numbers larger than four digits, you might want to use the four most significant numbers. For example: you could change 23001 to 2301 or 3001.

Consider using Radio Shack's General Ledger, Catalog No. 26-1552, in conjunction with APS since it is designed for four digit GL account numbers.

Setting Up APS

Before you begin using the Accounts Payable System, you should make copies (Backup) of your Program Diskettes. Program and Setup Diskettes have been included for both the Model I and Model III. Keep your original Program Diskettes in a safe place. You must also prepare (Format) a Data Diskette which will be used to store your vendor accounts and invoices. An unformatted Data Diskette has been included in this package to be used for your Model I or Model III computer.

If you are not familiar with Backup and Format functions, refer to Appendices A and B (at the back of this manual) for instructions.

The APS "Set Up" diskette is used to enter information about your company into the computer. After the "Set Up" is complete, you will run "APS" every time you use the system. (If you need to modify your company data, the APS "Set Up" program has a built-in "Modification" option.)

Caution: You may not run "Initial" Set Up again. If you do, you will lose all your information.

Follow these steps in setting up the Accounts Payable System:

1. Turn on the system. If you are not familiar with the equipment, please refer to your Disk Owner's Manual for System Start Up (Power Up Sequence).
2. Insert the Backup of the APS "Set Up" Diskette in Drive #0 and close the door.
3. Insert the formatted Data Diskette in Drive #1 and close the door. (If you are using a three drive system for more capacity, place another formatted Data Diskette in Drive #2.)
4. Press the Reset button on your computer.

5. The screen will show:

You type:

Press **ENTER**

RUN"SETUP" and press **ENTER**

Setting Up APS (continued)

The screen will show:

This is the Initial Set Up, so press **I**.

You will now enter information about your company. Type the information as it is requested by the program. The small blocks indicate the amount of space available for each entry. If you make a mistake, use the **←** key to backspace and make the correction.

Press **ENTER**, after you finish each line. Most entries in the APS program will require you to press **ENTER** after you type information. If, however, you are just answering a Y/N question, or selecting functions, you simply press the appropriate key — the TRS-80 will do the rest.

The last question is:

(C)ASH OR (A)CCRUAL ACCOUNTING? _ _ _ _

With Accrual, you only need to post your General Ledger entries at the end of the month. With the Cash method, you will post every time you print checks.

Press **C** or **A**, depending on which method your company uses.

The screen will show your Current Company Data. Check everything carefully. If there is an error, you will be able to correct it later. Press **ENTER** to continue.

Setting Up APS (continued)

The screen will show:

ASSIGNMENT OF GENERAL LEDGER CODES (GLC)

GLC: 1 & 2 ACCOUNTS PAYABLE (A/P) GL ACCOUNT #: _ _ _ _

GLC 1 and 2 are the General Ledger "Code Numbers" (GLC's) for "Accounts Payable". Code #1 is for Debits, Code #2 for Credits. You don't have to concern yourself with the Debit/Credit part — APS will keep it straight. Just enter your General Ledger "Accounts Payable" account number. The account number you enter cannot exceed 4 digits. If your Company's account numbers are larger than 4 digits, use the most significant portion of the number. (These two codes are used internally by APS.)

The computer will ask you to enter General Ledger account numbers for "Cash" (General Ledger Code #3) and "Purchase Discounts" (General Ledger Code #4).

The next 96 GLC numbers are optional. You may assign each of these "codes" a General Ledger account number, and a five letter abbreviated account description.

Your firm should already have General Ledger accounts for Cash, Purchases, Purchase Discounts, Sales Taxes, Shipping Charges, and various other categories. (Others that might be useful with this system include Refunds Receivable and Purchase Returns.) Later when adding invoices, all you do is enter the General Ledger code.

By using General Ledger Codes, the activity for a General Ledger account is accumulated, and current totals can be printed. At the end of the period, all totals can easily be posted to the proper General Ledger accounts.

When you've finished entering General Ledger Codes, type ☐1 for GL ACCOUNT NUMBER and press **ENTER**.

The screen will show:

WOULD YOU LIKE A PRINTOUT OF THE GLC'S? (Y/N)

At this point, you can printout a record of your General Ledger Codes, General Ledger Account Numbers, and General Ledger Account Descriptions. You'll need them for reference when you enter invoices.

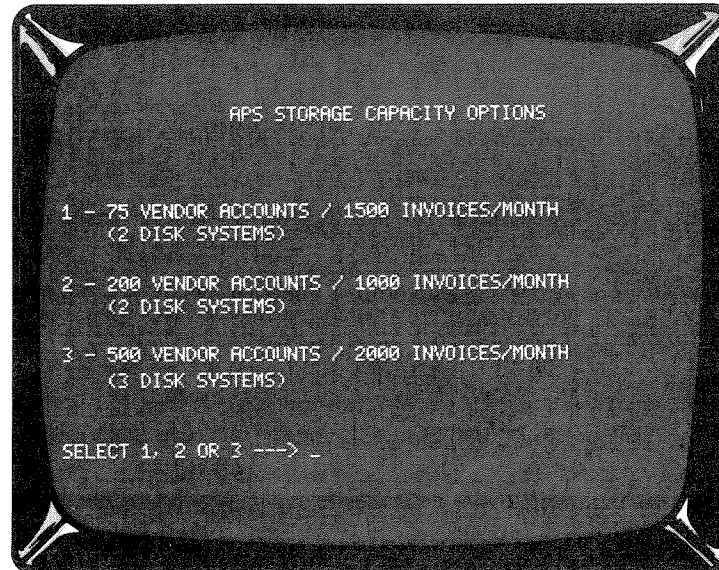

Note: If you ever need to add more accounts, use the Modification option.

Setting Up APS (continued)

The TRS-80 will ask:

The screen will show your Current Company Data. Check to see if there are any errors. Press **[ENTER]** to continue.

The screen will show:

If you press **Y**, the computer will store the Setup data. If you press **N**, you will go back and make more corrections. Press **Y**.

The screen will show:

Important: Once you have stored the Setup data, you may not run the Initial Setup again. If you do, you will lose all of your information!

If you ever need to make a change in your Setup Data, you may do so only after End of Period Processing. Insert the APS Setup Diskette in Drive #0, type **RUN"SETUP"**, and press **ENTER**. Press **M** for Modification. Type your password. The procedure is the same as making your previous corrections.

You are now ready to use the APS program. If you wish to start entering your vendors, remove the Set Up diskette from Drive 0, insert the Backup copy of the APS Program diskette in Drive #0, and close the door. You will start on the following page at step 6.

You type:

If you are re-using an old disk, the computer may show: DISKETTE contains DATA. Use Disk or not? If this question appears, type **Y** and press **ENTER**. The computer will start formatting the disk in Drive #1.

After the disk is formatted, you will return to TRSDOS Ready. Remove the formatted disk from Drive #1, and mark the disk with the name you've chosen. Always use a felt-tip marking pen. Pencils and ball point pens can damage the disk surface.

Rotating Your Copies

When you're using your system, get in the habit of making copies of both diskettes at the end of the day. The next day, use the copies that you just made. It's a very inexpensive form of insurance. You might consider even carrying the backup copies home at night in case of fire, theft, or vandalism. You should also save the diskettes that contain the last completed month.

Here's an example, using two extra diskettes:

The first day's diskettes we will call A and B. The next day's diskettes will be called C and D.

Day One

Day Two

On the second day, you will take A and B, and use them as blank diskettes to copy C and D. If something happens to a diskette, you still have the last backup copy to rely on. Four extra diskettes will give you three days of record protection.

Be sure to keep the last completed month's set of diskettes till you complete the current month. This is very important in case of a major problem.

Note: The most effective method for erasing diskettes is by using a Radio Shack Bulk Tape Eraser, Stock No. 44-210.

Increasing Storage Capacity

This version of APS has a feature which allows you to increase the Storage Capacity by adding a third Disk Drive, even if you started your system with two. (Remember, if you originally set up APS with Storage Capacity Option 1, you should not choose Option 2.) To perform this operation, use the following procedure:

1. Insert the Setup diskette in Drive 0 and the Data diskette in Drive 1. Type `RUN"SETUP"` and press `ENTER`.
2. Leave the Setup diskette in Drive 0. Since you are selecting the 500 Vendor, 2000 invoice option you must place a formatted diskette in Drive 2 before proceeding. Select Modification Mode to change Storage Capacity. If you select Initialization Mode, all former data will be destroyed.
3. After completing the Storage Capacity change, insert the APS Program diskette when instructed, and type `RUN"APS"` and press `ENTER`.

Note: Remember that the Three Drive Option requires a 48K computer.
